The best
of ICT with
a human touch

VINCI 
ENERGIES

To **improve the lives** of people and organizations

We offer **the perfect combination of Technology and Services**

In an **increasingly connected world,**

businesses across industries face incredible challenges trying to keep up with the ever-changing expectations of customers. We develop the best technology solutions for our customers so that they can grow, compete, and achieve their objectives in a continuously evolving global market.

We help our customers to manage the complex **digital transformation** in full autonomy, bringing together technological change with the introduction of winning solutions.

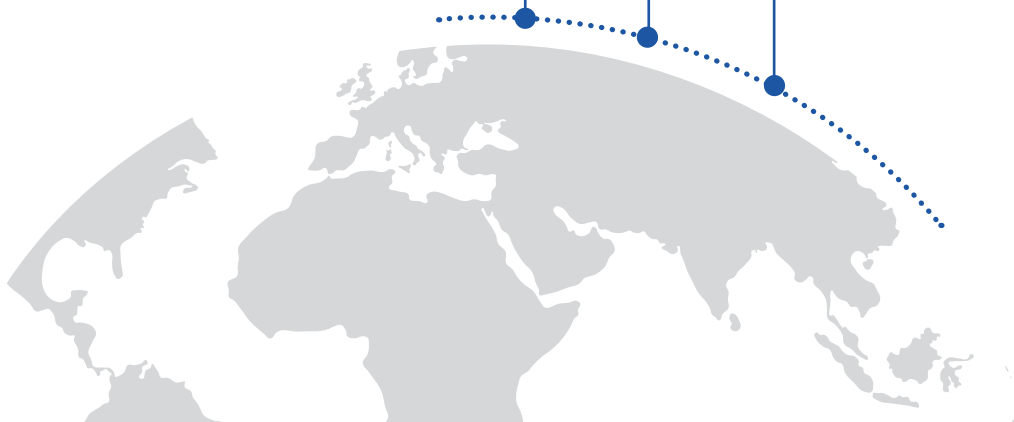

We meet all ICT needs through a **full range of solutions and services** related to business applications and data analysis, corporate networks and digital workspaces, datacenters, cloud services and telecommunications infrastructure. Additionally, within all these areas Information security is our priority.

Axians is the ICT brand of the VINCI Group.

Global presence

Local teams to meet **every need**

Constantly **growing turnover**

The best of ICT with a human touch

Each business sector faces different challenges and that's why we offer **tailor-made solutions and services.**

Knowledge and experience allow us to identify, together with the customer, the technology that best suits their specific needs.

That is the meaning of: **"the best of ICT".**

Being present for, and close to the customer sets us apart from the rest, because for us, people come before technology. People working for people. This is Axians and that is the meaning of **"with a human touch".**

Development
of innovative projects

A complete
portfolio of solutions

We work by your side to improve people's lives

Cruise

on large cruise ships

We develop technological solutions and digital infrastructure to ensure the safety of all passengers on board and to allow guests to live an unforgettable and personalised cruise.

Retail, GDO & Industry

inside retail outlets

We provide the retailers with innovative solutions to improve the customers' experience, generate a personalized shopping experience and maintain a competitive advantage on the market.

Transportation Rail & Road

on board means of transport

We create software platforms that monitor passenger numbers, flows and routes to optimize the planning of routes, thus achieving significant savings in transport costs.

Public Administration

in public institutions

We create innovative solutions for the digital transformation of Public Administrations. We provide collaboration services, physical and cyber security services to healthcare, universities, LAPs and PACs, to simplify access to services by citizens.

Enterprise

in every type of company

We offer different solutions to digitize industrial production models, making companies more competitive and able to respond flexibly to market needs.

VINCI Energies values are our values

We share skills and create opportunities to **increase efficiency and address global challenges.**

For this reason, our brand is based on values common to the whole Group, values fundamental for the company and for our collaborators

TRUST

It is the essential condition for establishing lasting relationships with our partners and customers. Trust is based on transparency between Group teams and in professional relations. That's why we believe in the power of our network.

SOLIDARITY

We actively work to achieve common goals. Solidarity increases our sense of unity and facilitates collaboration. We can only achieve our goals with everyone's commitment because real success is shared success.

AUTONOMY

We believe in the training and enhancement of people. We bet on the autonomy of every employee, giving them space and freedom of initiative. This allows us to be closer to our customers and to ensure high performance in line with rational time and cost management.

RESPONSIBILITY

Our success depends on our responsibilities to the customer, the project and our colleagues.

ENTREPRENEURIAL SPIRIT

At the base of all innovative opportunities and ideas is the entrepreneurial spirit of each of us. It is thanks to the contribution of each of our collaborators that the organization can develop new business opportunities.
